## EDUCATION

### Nanyang Technological University, Renaissance Engineering Programme (REP)

Singapore

Bachelor of Engineering Science in Computer Science

Aug 2013 – May 2017

Master of Science in Technology Management

Jan 2016 – Dec 2017

- **CGPA:** 4.58/5.00 (First Class Honours)

### University of California, Berkeley

California, USA

1-year Study Abroad

Aug 2015 – May 2016

- Directed a team at Hacktech2016, a 36-hour hackathon held at Caltech, to develop an image recognition system that can detect red light signals and warn users verbally; presented prototype at an open exhibition.
- Created a website using Flask and Twitter Bootstrap, and a mobile app using Ionic to crowdsource first aid personnel by proximity during medical emergencies, and pitched to venture capitalists as part of an entrepreneurship class.

## PROFESSIONAL EXPERIENCE

### Palantir Technologies | Software Engineer

Dec 2019 – Present | London, United Kingdom

- Worked on Foundry, which is a core product used for visualizing, branching, analyzing, and organizing data, using React, Typescript, BlueprintJs, Java for the backend, and other technologies like DataDog and Conjure.

### Grab | Software Engineer (Full Stack)

Feb 2018 – Nov 2019 | Singapore

- Built web application in Ruby on Rails, React, and GraphQL, for internal use by customer experience team regionally. High focus on monitoring through DataDog and Scalyr which helped identify performance issues.
- Used AWS infrastructure for quick scaling, efficient use of resources by load balancing, and cached content delivery.
- Worked on backend microservice for customer appeasements, using Golang, DynamoDB, and gRPC.

### TD Securities | Web Application Developer Intern

May 2017 – Jul 2017 | Singapore

- Built a web application using Java Spring and AngularJs for employees across the Singapore, London & Toronto offices to monitor statuses of hundreds of systems, allowing scalability and easy integration. Features included APIs for manual/automated updates, email notifications, and data visualization using d3.

### Merck & Co. | Web Development Intern

May 2016 – Jul 2016 | New Jersey, USA

- Co-developed two dynamic websites that provided internal search functions. Employed iterative agile methodology for the SDLC process. Websites reduced user search time by 5 clicks, and provided responsive UI.

## AWARDS

### Surbana Jurong Hackathon 2017

2<sup>nd</sup> Place

- Developed a mobile app that acts as an online marketplace for service providers. Users can buy and sell goods and services, with recommendations based on location and user history, as well as request for new goods and services.

### IMDA Code::XtremeApps::2017

3<sup>rd</sup> Place

- Built a web app to improve efficiency of customer service centers by prioritizing written, audio, and image feedback through a learned model. Key features included automated template responses to standard feedback, a chatbot to handle FAQs, allocation of high priority feedback to service reps, and data analytics for insights.

### P&G's 'Disrupt the Laundry Experience' Pitch Day 2017

3<sup>rd</sup> Place

- Implemented a machine learning algorithm in a mobile app to suggest optimal time for users to do their laundry. Suggestions consider the user's personal schedule, and includes fabric care tips based on type of laundry done.

## SKILLS, ACTIVITIES & INTERESTS

**Languages:** English (Fluent), Chinese (Intermediate)

**Technical Skills:** React, Redux, Javascript/Typescript, GraphQL, HTML5, CSS, Java Spring, Ruby on Rails, Python, Django, Flask, PostgreSQL, MySQL, AWS (S3, ElasticBeanstalk, RDS, DynamoDB, Cloudfront, EC2, ELB etc)
